# Microbiology: An Introduction With MyMicrobiologyPlace Website (10th Edition)

## Synopsis

This #1 selling non-majors microbiology book is praised for its straightforward presentation of complex topics, careful balance of concepts and applications, and proven art that teaches. In its Tenth Edition, Tortora/Funke/Case responds to the #1 challenge of the microbiology course: teaching a wide range of reader levels, while still addressing reader under-preparedness. The Tenth Edition meets readers at their respective skill levels. First, the book signals core microbiology content to readers with the new and highly visual Foundation Figures that readers need to understand before moving forward in a chapter. Second, the book gives readers frequent opportunities for self-assessment with the new Check Your Understanding questions that correspond by number to the chapter Learning Objectives. Then, a new à œvisual learningâ orientation includes: an increased number of the popular Diseases in Focus boxes, newly illustrated end-of-chapter Study Outlines that provide students with visual cues to remind them of chapter content, and new end-of-chapter Draw It questions. The all-new art program is contemporary without compromising Tortora/Funke/Caseâ™s hallmark reputation for precision and clarity. Content revisions include substantially revised immunity chapters and an increased emphasis on antimicrobial resistance, bioterrorism, and biofilms. The new Get Ready for Microbiologyâ workbook and online practice and assessment materials help readers prepare for the course. The Microbial World and You, Chemical Principles, Observing Microorganisms Through a Microscope, Functional Anatomy of Prokaryotic and Eukaryotic Cells, Microbial Metabolism, Microbial Growth, The Control of Microbial Growth, Microbial Genetics, Biotechnology and Recombinant DNA, Classification of Microorganisms, The Prokaryotes: Domains Bacteria and Archaea, The Eukaryotes: Fungi, Algae, Protozoa, and Helminths, Viruses, Viroids, and Prions, Principles of Disease and Epidemiology, Microbial Mechanisms of Pathogenicity, Innate Immunity: Nonspecific Defenses of the Host, Adaptive Immunity: Specific Defenses of the Host, Practical Applications of Immunology, Disorders Associated with the Immune System, Antimicrobial Drugs, Microbial Diseases of the Skin and Eyes, Microbial Diseases of the Nervous System, Microbial Diseases of the Cardiovascular and Lymphatic Systems, Microbial Diseases of the Respiratory System, Microbial Diseases of the Digestive System, Microbial Diseases of the Urinary and Reproductive Systems, Environmental Microbiology, Applied and Industrial Microbiology . Intended for those interested in learning the basics of microbiology.

## Book Information

Hardcover: 960 pages

Publisher: Benjamin Cummings; 10 edition (January 9, 2009)

Language: English

ISBN-10: 0321550072

ISBN-13: 978-0321550071

Product Dimensions: 9.5 x 1.4 x 11.1 inches

Shipping Weight: 5.3 pounds (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars 760 customer reviews

Best Sellers Rank: #27,085 in Books (See Top 100 in Books) #60 in Books > Medical Books > Basic Sciences > Microbiology #244 in Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Biology #383 in Books > Science & Math > Biological Sciences > Biology

## Customer Reviews

Gerard J. Tortora is a professor of biology and teaches microbiology, human anatomy, and physiology at Bergen Community College in Paramus, New Jersey. He received his M.A. in Biology from Montclair State College in 1965. He belongs to numerous biology/microbiology organizations, such as the American Society of Microbiology (ASM), Human Anatomy and Physiology Society (HAPS), American Association for the Advancement of Science (AAAS), National Education Association (NEA), New Jersey Educational Association (NJEA), and the Metropolitan Association of College and University Biologists (MACUB). Jerry is the author of a number of biological science textbooks. In 1995, he was selected as one of the finest faculty scholars at Bergen Community College and was named Distinguished Faculty Scholar. In 1996, Jerry received a National Institute for Staff and Organizational Development (NISOD) excellence award from the University of Texas and was selected to represent Bergen Community College in a campaign to increase awareness of the contributions of community colleges to higher education. Berdell R. Funke received his Ph.D., M.S., and B.S. in microbiology from Kansas State University. He has spent his professional years as a professor of microbiology at North Dakota State University. He taught introductory microbiology, including laboratory sections, general microbiology, food microbiology, soil microbiology, clinical parasitology, and pathogenic microbiology. As a research scientist in the Experiment Station at North Dakota State, he has published numerous papers on soil microbiology and food microbiology.

Christine L. Case is a registered microbiologist and a professor of microbiology at Skyline College in San Bruno, California, where she has taught for the past 38 years. She received her Ed. D. in curriculum and instruction from Nova Southeastern University and her M.A. in microbiology from San Francisco State University. She was Director for the Society for Industrial Microbiology (SIM).

She received the ASM and California Hayward outstanding educator awards. In addition to teaching, Chris contributes regularly to professional literature, develops innovative educational methodologies, and maintains a personal and professional commitment to conservation and the importance of science in society. Chris is also an avid photographer, and many of her photographs appear in this book.

As far as the book being the correct edition and getting the book on time, everything was great. However, i bought the hardcover book new and it was damaged already. There were what seemed like bite marks on the edge of the book and small dents on the side of the cover. Also i wish i had known the access card was all the way in the back between last page and cover. Its not a big deal but i freaked out at first because i couldn't find it when i first opened the packaging. Everything else was fine.

I used this book for the Fall 2015 semester. It was easy to understand. The tables helped out wen I was reading the chapters, and the drawings were exceptional! Great textbook! I am glad my instructor chose this.

Arrive on time, Perfect in all shape, color as in the image, there is wear and tear, but I like it. Holding the book and browsing the pages overshadow the tear and wear. Stick to the textbook and study guide. Thanks so much :)

Great student resource, even if you have this older edition. I don't generally write reviews for textbooks, but I'd recommend this even if you aren't taking micro. A very well written text which is well organized. If you read each chapter before going to class, it'll be hard not to get a good grade. The way that the material is presented in this book is as good or better than any lecture on the subject. I saved money by buying used older edition, and I got an A. I hope you do too!

While it says that rentals may or may not have the access code, ensure you buy/rent the book WITHOUT the access code and etext (a la carte)! gives a disclaimer saying an access code is not guaranteed but the price is still significantly higher, even though you don't get your access code. So you'll be paying extra for nothing. You'll still have to buy an access code from Pearson. I made refund me the difference, so learn from my mistakes.

Had to buy this for class. The book arrived quickly and in excellent condition. I'm glad to have the access code too because there are some useful study tools plus I can access the textbook anywhere.

Book was exactly as described. You will need at least a 1 and a half - 2 inch binder for this booklet

This book was inexpensive to rent and it was very detailed. It allowed to reader to gain much knowledge about microbiology.
