Top Fuel Dragster: The Quickest And Fastest Racing Cars On The Planet! (Owners' Workshop Manual)

Synopsis

Top Fuel Dragsters are the fastest racing cars on the planet. Powered by huge 8,000bhp engines, the quickest cars can accelerate from 0â ¨C 100mph in less than a second, reaching over 330mph by the end of a quarter-mile timed run. The noise and spectacle of a Top Fuel Dragster in action is truly astonishing. This fascinating manual provides a unique insight into the engineering of these incredible machines, and takes a look behind the scenes from the perspective of the driver and team members to explain how the cars are designed, built, maintained and driven.

Customer Reviews

Dan Welberry is a long-time drag racing fan, with a passion for the sport since childhood. He has built up an enviable reputation as a leading marketing and PR man in European Drag Racing. He and former four-time FIA European Top Fuel title-holder and record breaker Andy Carter teamed up in 2001, with Welberry taking on marketing, PR and sponsorship duties for the team. Away from racing Dan runs a design and marketing company based in Christchurch, Dorset.

I buy engineering, performance, cars and related books, and this one seemed to be a no brainier since is Haynes and Top Fuel all together. THis time i must admit, i was expecting way more. Don't get me wrong, it's a cool book and for sure is a nice piece in my shelf, but as a book, Top Fuel book, backed up by Haynes, it was below my expectations.

Information was good but wish it was about American racing

It was great information which helped understand what happens in the pits, on the starting line, and down the racetrack.
