This edition contains essential information for beginning researchers and it is presented in a clear

and coherent way which engages the reader. The reader is carefully supported through references to research, questions posed and very well thought through examples. This is a publication which is a pleasure to read cover to cover, although it can be dipped into as necessary. Careful and appropriate support is provided to enable a beginning researcher to start research with an appropriate level of confidence. --Dr Liane Purnell

This is a very good book for people who are unfamiliar with the research process. It steps the student through the rationale of doing research in the social sciences and the step by step approach to building up the research capability that masters or early doctoral students will need. It does not cover some areas of the foundations of research, for example the philosophy behind conducting this type of research and, therefore this would have to be supplemented by other texts. However, I have added this to our reading list and would recommend it particularly to those who have been out of academia for a while and have not conducted empirical research in the past. --Dr. Claire Collins

"Inspection Copy Feedback" Excellent book, explains research methodology really well, clear and easy to follow. I will be using this book on a number of programmes to develop students understanding of research methodology. --Mark Barnett

Very helpful book for beginners who are looking to write research papers. I needed this book for a transfer class and it really helped me with my 15 page research paper. Got the A I was aiming for :) definitely worth the purchase!

This is written for undergrads....thought it would be much more in depth...pretty elementary...too much "too much".

very boring book but it has all of the information I need for my class

Not a reader friendly text, but the content is well organized. Some topics are covered extensively while others skimmed. Will need to take breaks when reading for comprehension.

This text gives step by step guide in writing a successful research paper.. love it!

Product description was on the money. Excellent and fast service.

Excellent resource. Easy read, have cited in my own research.

Love it!...
