# Creating With Milling Machines (Getting Creative With Fab Lab)

## Synopsis

This title aimed at sixth-grade-level readers will explain how CNC milling complements the other processes completed in a Fab Lab and where a CNC milling machine operator fits as a maker. The many sources for further reference fulfill Common Core Standards by offering a means through which readers may draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently. If the projects ranked by difficulty don't offer enough inspiration, real-life examples of how milling machines solve problems will do it.
