[View larger](#) **Our Company History** In 1928, at the age of twenty-two, Peter Beilenson began printing books on a small press in the basement of his parents' home in Larchmont, New York. Peter and later, his wife, Edna sought to create fine books that sold at prices even a pauper could afford. Today, still family owned and operated, Peter Pauper Press continues to honor our founders' legacy and our customers' expectations of beauty, quality, and value. Image: Peter Pauper Press headquarters, Mount Vernon, New York, circa 1948.

I love this handy book it's so easy to input all the data that is essential to track as a new parent in one simple place the pages are concise without a ton of irrelevant question or blanks the only reason I rate as 4 stars and not 5 is the chart in the back for growth is very small and can be difficult to plot points however this is a small concession for how great this record keeper is

Everything you need to document the growth and development of your soon to be child from emergency contacts, Doctors, height/weight log, allergies, special medical conditions and shot records and more! Important information on a paper and pen log in our digital age and fun, not to mention something you can give to your child when they are an adult. Great buy at a very affordable price, get one for each child as you grow the family!

I love this records book. It is so cute and so detailed. My favorite feature is the little pocket in the

back where I store my daughters little cards she gets from her pediatrician. I got a state vaccine record for my son when he was born in Arizona (Louisiana doesn't have them) but I am tempted to purchase another of these books so he can have all of the details when he is older as well. While this may take some time if not purchased for a baby, it would still be worth it. Everything is laid out for you. Also great for organization. you don't have to keep every single piece of paper anymore!

I was looking for something to keep track of our son's future Dr's visits. I purchased 2, one for my niece as she is expecting as well. I have to say couldn't be happier. It is well organized starting with the Birth and followed by 1st months well visit. It has room for the vaccinations and medical notes as well as progress. Definitely recommend if you want to stay organized and on top of your Newborn's medical records at home. Easy to use for daycare as well as it shows proof of vaccinations and can be copied if necessary.

Love that it's kind of set up for me. I just go to the corresponding appointment page and fill in how it went. Bonus pocket in the back is awesome for keeping little notes. I keep his immunization records there so I know where everything is and it's all together. Also has the percentile charts in the back so I can keep track of it if our dr doesn't show me. The teeth chart is also really nice because it tells you what teeth are expecting to come in and what age range to expect them. Will definitely be buying this for every child! Simple and lightweight, but has the info I need

My mother bought this for us when we were expecting our son. It is such a nice little book to keep in your diaper bag to record all sorts of details regarding their health. There is a section for family health history all the way through teenage years and any procedures. Our son is 3 months old and we've pulled this book out twice at different appointments to help recall details. Will also make a perfect keepsake to look back on in adjunct to a baby book.

Exactly what I was looking for. I have tons of space to have a detailed medical book for each of my kids. I purchased sticky tabs so that I can find categories easily and I use an erasable pen so I can erase mistakes as this, of course is not a book where you can add pages.

Great way to organize health info, well visits/check-ups, sick visits, immunizations, illnesses, allergies, accidents etc. Has charts to record and track height/weight and primary tooth eruption and loss. Also has a pocket to tuck papers/documents. I'm so happy with this I have one for each child.
