Bonnie J. Flom's passion for medical billing and Medisoft began in February 1984 while working in the accounts receivables department in St. Joseph's Medical Center.Â While there, she served on the Blue Shield EDI committee, United Way Committee, and Benedictine Mission Committee.Â in 1994, Bonnie decided to break out on her own and started Rapid Return Medical Billing.Â Medisoft was used in the billing agency, and in 1995, Bonnie became a Medisoft dealer.Â Her billing agency grew quickly and employed up tot seventeen people at one time. Then in 2000, Rapid Return Medical Billing served Blue Cross Blue Shield of Minnesota in testing their Optical Character Reader (OCR), which autnomatically converted paper claims to National Standard Format (NSF) files.Â In 2001, Bonnie began serving on the Medicare Advisory committee for the State of Minnesota (PCOM).Â In 2001, Rapid Return Medical Billing won the Medisoft contest for setting up the first 100 clinics to transmit electronically.Â In 2002, Bonnie joined the HBMA (Healthcare Billing and Management Association).Â In 2006, Bonnie began focusing solely on Medisoft by starting a separate company called Softouch Software and billing company known as Billing Buddies.Â Bonnie is also the creator and host of the Google group called Medisoft and Medical Billing.

I absolutely love this book. I'm teaching myself the Medisoft software. Cause I took a adult coarse in this field and we didn't get a chance to do medical billing with Medisoft. And too the school had computers that wasn't working or worse stolen from the school. So my instructor told me they have demo CD of Medisoft where you can teach yourself and I got one from (Medisoft Version 16) along with this book and it so easily broke down that if you don't know it at all you will know it now. It has assignments and step by step instructions through out the book to let you know how to funtion

Medisoft properly and efficiently. I have told my friends who also are taking the same interest in this field to get this book. And they love it.

It was not current and the information did not help at all. Should not be sold as having current information.

THIS book explains the process, and maintain medical records of hospital and clinic patients in a manner consistent with medical, administrative, ethical, legal, and regulatory requirements of the health care system. Process, maintain, compile, and report patient information for health requirements and standards in a manner consistent with the healthcare industry's numerical coding system.

Very useful book if you want to master Medisoft billing software

As a Psychology Major, I needed a get-a-job-quick scheme so I decided to take some courses in Medical Billing. The book was in perfect condition but way too elementary for my level of knowledge. I think it's just the course material instead of the book itself but this was real snoozer to me and needless to say, I have not pursued an interest in Medical Billing as a quick alternative to getting a job as soon as possible. Boring book, boring subject. Easy to follow, just not enough to hold my interest; especially not for a career/job move!

the item was in grat condition and it has been a gread addition to my bussiness.Thank you
