I was looking for a book that would give me an overview of knowledge I needed for a new startup I'm pursuing. This one gave me the confidence I needed to proceed. It is not the last book you'll need but is a great first book. Once you've read this book, move on to some detailed books in market research, marketing, read on the use the Wave software for your bookkeeping, etc. I'd also watch some of the videos on YouTube like Sam Altmans Lecture 1. I'm glad I started with this book though. Not complete but a good start. Download the sample and look at the table of contents to see if the book offers areas you're interested in learning and go from there.

This book is well organized and easy to read. It is a good starting point.
