Raising Self-Reliant Children In A Self-Indulgent World: Seven Building Blocks For Developing Capable Young People

Synopsis

No Parent or Educator Can Afford to Ignore This Groundbreaking Work! Bestselling authors H. Stephen Glenn and Jane Nelsen have helped hundreds of thousands of parents raise capable, independent children with *Raising Self-Reliant Children in a Self-Indulgent World*. On its tenth anniversary, this parenting classic returns with fresh, up-to-date information to offer you inspiring and workable ideas for developing a trusting relationship with children, as well as the skills to implement the necessary discipline to help your child become a responsible adult. Those who think in terms of leniency versus strictness will be surprised. This book goes beyond these issues to teach children to be responsible and self-reliant "not through outer-directed concerns, such as fear and intimidation, but through inner-directed behavior, such as feeling accountable for one's commitments. Inside, you'll discover how to instill character-building values and traits in your child that last a lifetime." During these turbulent days when families are in disarray and children are getting the short end of the stick, this book can be very helpful to parents who are struggling to bring up self-reliant children. Even after raising five of my own and becoming a grandfather for the seventh time, I got some new ideas out of it!" "Art Linkletter" An inspiring, workable formula for developing closeness, trust, dignity, and respect . . . a real gem." "Becky Ridgeway, School Social Worker

all parents---it's a MUST read !!!! We have a bunch of kids being raised now that have a lack of gratitude for all they have, Even my kids, who are pretty wonderful, do not know how good they actually have it. Help your kids but being firm and kind. Give them really strong consequences for their inappropriate behavior....and stick to it!!!! Take away those phones, I pads, and anything they escape into. YOU are the parent--not them. If it's kinda rough now, it's only going to get worse...nip it in the bud!

love this book, had to buy it for a college class requirement for Early Childhood Studies and it became a vital tool in learning but the practical , what I call exercise, information having been life changing in raising my own daughter and now grand children. I t is well written and easy to understand. This is a book I continue to reference back to quit often and have recommended it to many families and programs/schools

This book helped me realize how better to communicate to my children which in turn will let them know how very special they are. This book talks about treating children with respect because after all, they are people too! It talks about how to help kids become responsible for their own actions. This book has a lot of good ideas. It will take practice and patience, but I am trying to use the ideas

on my children. I know that by using the new methods in this book, I will have a greater relationship with my children. Sometimes as parents, we tend to be a little too demanding on our kids. We should let them make some decisions for themselves and let them think things through, without us interrupting and "saving the day" for them (even though it would be easier to jump in and save them)! This way, they learn how to think and act for themselves and learn from their mistakes. I recommend this book for parents or anyone who cares for children in one way or another!

Great book

This is just the book I have been looking for. The authors have finally cracked the nut in writing a parenting book with simple, powerful, and easy-to-implement concepts that can have quick impact. Finally, a book without hyperbole, or too frequently inserted religious references. This is a great piece for reference, and one I have thoroughly enjoyed using in my day-to-day life.

This book is a must read!

I have had the pleasure of meeting Stephen Glenn at a number of seminars and look forward to taking the Developing Capable People workshop so that I may lead parenting classes for our school district (check the research on test score improvement in school districts providing families with these skills). My only "complaint" is that I did not have access to this material while raising my own children. I DO raise 32 a year and have used the seven steps for developing capable people as the basis of my philosophy for teaching. Over the last 19 years there have been but a handful who did not respond to methods suggested in this book - two were diagnosed as having severe psychological disorders. It is NOT a cookie cutter solution to raising children, nor is there any inference that parents don't DO for their children. It is about HOW we do for them - it is a guide to help you hear yourself and THINK about how and what you communicate to your children. I don't subscribe to any philosophy that is extreme in either direction, and I never felt that message related in this book. What HAS done is remind me that my job is to help a child see himself/herself as capable - to develop intrinsic motivation. It is a HUGE job today when so many young people see themselves as lacking in academic skills. While their parents undoubtedly love them, they are often ill equipped to effect change. This book provides such a well written, easily understood narrative that one cannot help but come away with a better sense of "how to" and a set of skills that will be useful, even if only a few steps are implemented. It is a book I give to every new parent as a gift,

one that I will continue to purchase with my own money for ANY parent who struggles and is concerned about his/her child's well being. If I were emperess of the world, it would be required reading before taking a new baby home from the hospital (and certainly one for young single mothers choosing to raise their babies). I'm willing to step out and even suggest it be made mandatory for all educators too! Don't miss this book! I am about to purchase my 50th plus copy.

I actually ordered the whole program by H. Stephen Glenn (by the same title). I use it for parenting classes in my community. Although I don't totally agree with his discipline tactics, they are effective (I'm not totally against spanking if done with love). Anyway, his overall concept is one that is very much needed in our society, children of today aren't problem solvers. This book will guide you into making your child into an accountable young adult.
