Customer Reviews

This was a pretty good series but I was left hanging at the end. There was no finish for Mack & Amber.

This is a nice rainy day read however story line needs more science under penning Nano solar regeneration would help. Making new body parts takes energy Liked the details, i.e., insect infection.

Overall 3+*

great read. enjoyed every moment of reading the three books. would of liked a better ending with them finally free

Kinda strang concept. Worth checking out though

Another great new twist on the zombie apocalypse great characters really twisting and turning action-packed storyline. Humanities struggle through the apocalypse and the depravity of some survivors and the violence of zombies can't beat it

Great read, well worth your time. The box set is nice because you know you have a ton of awesome reading ahead of you. This is the kind of writing that makes you panic as you get close to the end, because you are going to be bummed when you are done. Don't like the ending because it was kinda left hanging, but hopefully he will put another into this series, it could go on and I hope it does. I hope this is not where the story ends. Would love to see Mack and Amber find a nice place where they are finally safe and live happily every after.

I enjoyed this trilogy! Kept my interest and very well written! Not the usual zombies but liked the idea of enhanced zombies. Hope there will be a follow up book! Great story!

There are two aspects of this book I would like to discuss: The story itself and the writing. Let's go into the writing first. This is another book(s) that would greatly benefit from proofreading. While these things in and of themselves are not a show stopper, it does make reading the book(s) distracting and at time difficult. Sometimes the errors are so bad you have to puzzle out what was trying to be said. There are numerous autocorrect like substitutions, wrong use of tense in words, and some really poorly constructed sentences and phrases. These errors are frequent enough to distract from the story. As for the story (may contain spoilers)... This is your typical zombie apocalypse fare. It is written at about a sixth grade reading level. Unfortunately the story abounds with plot holes, conflicting information, and adolescent badassery. What do I mean about plot holes? Well, for one, our hero is introduced to us with a heart condition that requires medication. A point was made early on to show us that Hero needs his meds. The group even goes so far as to secure said meds. Afterwards, once meds are secured, no mention of the heart problem comes up again. One can

assume since meds are on hand that Hero is taking them...but what about the three (two? another plot hole makes this unclear) weeks spent in captivity, chained to a pipe? Were the captors ensuring Hero takes his pills? yea, didn't think so. Another time the group takes a minivan, that later is referred to as the Truck, than again it is a minivan....Transformer maybe? All kinds of stuff like this occurs throughout the book(s). Then we have what I call the "convenience factor". This is where unsophisticated writing results in the Heroes always finding what they need in the nick of time....and the ideas are always off a badass variety....it's a bit like wish porn... Often the writing reflects the authors lack of familiarity with a subject. If it is guns or environmental issues, it is clear the author is working from cliched ideas and possesses little or no real experience with the subject. Last and final point is the flawed ideas in the story....we have zombies (who are fast and slow depending on what the author wants at the time) who slowly develop metal skeletons....yes, seriously.....not sure how this is even a thing..even with a scifi push. What finally made me go "please just stop" was the metal birds...what laws of physics had to be suspended for all metal birds to fly just like tier fleashy brethren? Anyway, I eventually gave up after it became clear this wasn't getting any better. With all that said, it is a simple romp through a fantasy zombie environment....so if you want light reading that you can't take seriously...the price is right.
