There's more to decorating a home well than simply selecting furniture and accessories for each room. A well-dressed home has a certain flair throughout that's stylish and inviting. That sense of style unfortunately doesn't come naturally to most people, so *Signature Style* aims to help you learn from those who have it in spades. The book features eight American designers, each of whom has a distinctive sense of style, and all of whom are masterful in their approach to interior design. Charles Faudree, for instance, specializes in combining French and English touches, such as toleware and Staffordshire figures. This artful mix of European high style and country brings warmth, comfort, and class to all of his rooms. Gary McBournie, on the other hand, brings a very American look to his homes with rag rugs, New England furniture, and antique handmade quilts, while also

incorporating European and Asian pieces. Mary Douglas Drysdale melds neoclassical design with modern pieces and throws in her trademark detail of antique weathervanes; Kely Amen, on the other hand, favors the use of bold color over accessories. Other designers whose works are profiled include Thomas Bartlett, Paula Perlini, Kelly Amen, Douglas Rasar, and Alessandra Branca. This assemblage of designers brings an impressive amount of training and knowledge to their field--many have classical training at prestigious interior design schools, as well as backgrounds in art, art history, and architecture, and formative experiences in other countries. But the proof is in their designs, and the result is always breathtaking. Well written and laid out, this beautiful book is checkered with plentiful, large color photos of each designer's work. The editors have done a superlative job of selecting some fine American designers to feature in the book--each of these artists brings a timeless yet unique style to his or her work. Readers of Signature Style would do well to take some cues from the designers featured when trying to formulate their own signature style. --Kris Law

These three books are beautifully illustrated with photographs of contemporary interiors. In the Waverly book four stylesAEnglish country, clubby elegant, lighthearted and eclectic, and high-style ColonialAare shown for living rooms, bedrooms, and dinning rooms, all sporting Waverly fabrics and wallpaper. The advantage of this book is the availability of Waverly products so that one can achieve exactly the look depicted. The book from Traditional Home focuses on designers who style a home in the classic look favored by the magazine. Like the Waverly book, this title gives do-it-yourself projects at the end. Rennicke's book takes a look at how the American Colonial style has been interpreted today. Illustrated with pictures of homes in the South, the Midwest, and New England, this book gives an overview of its interpretation of classic American style and then focuses on the use of color, fabric, and the like to explain and depict how to achieve this decorating style. Recommended particularly for its focus on American design. Copyright 1999 Reed Business Information, Inc.

Owned this book long ago, loaned it to someone and never got it back. So happy to have found it again through . It's a great book.

Greatly enjoyed the book

Drooled as I flipped thru page after gorgeous page.....a great coffee table book or a book to read

as you sip your coffee!

I had checked this book out of the library and loved it so much that I purchased it I love it even more now that I own it

I subscribe to Traditional Home magazine and have purchased their other books. Signature Style was a terrible disappointment. It lacks the interesting, informative style for which they are known. Pictures and text are below par. Gives you the feeling this was done by some other entity who dashed it off without much thought. Save your money.

I inadvertently thought that the entire book would be Mary Douglas work only. She is one of my favorites interior designers, and was therefore disappointed to find that several designer's were featured.

The cover is the best thing about this book. The book has a very 80's, overdone vibe. Lots of chintz and heavy decoration.

This has been my favorite book now for a couple of months, and I finally had to write a review that disagrees with the previous negative ones. There's no nice way to say this, but maybe there is a new money-old money difference in perception here. What I see in the book is one gorgeous and highly livable room after another. Lively, vibrant, personal and comfortable homes obviously used by real people. What I didn't expect was that I would pick up as many decorating ideas for my own home as I did.
