# The Research Experience: Planning, Conducting, And Reporting Research

## Synopsis

The Research Experience: Planning, Conducting, and Reporting Research by Ann Sloan Devlin presents a process-oriented approach to research for students in the behavioral sciences. In-depth, practical advice for conducting each step of the research process includes coverage of the most common research methods and current technologiesâ€•including Qualtrics, Google Scholar, and Mechanical Turkâ€•as well as techniques for finding participants and collecting data in a variety of settings. With robust pedagogy and six helpful appendices, this text will further readersâ€™ ability to produce well-executed projects and critically evaluate information in both their personal and professional lives.

## Customer Reviews

"While most research methods textbooks use little citation which suggests that much of the content is the author's original thought, this author uses, in a masterful way, a variety of sources to teach each characteristic of the research process,"--Charles Baker"The text does a great job of touching upon all relevant areas of applied research while presenting the information in a manner that is understandable to students first exposed to the research process." --Michael J. Rovito"[Key strengths of the text are] many good examples, interesting questions interspersed in each chapter, helpful guides to successful writing, interesting ideas to ponder, and up-to-date content on online subject pools."--Mark W. Dewalt"The text walks students through the logistics of actually running a study or experiment. It also deals with technology and the advantages and disadvantages of the

technologies that students most rely on." --Pauline S. Sawyers-While most research methods textbooks use little citation which suggests that much of the content is the author's original thought, this author uses, in a masterful way, a variety of sources to teach each characteristic of the research process,---Charles Baker-The text does a great job of touching upon all relevant areas of applied research while presenting the information in a manner that is understandable to students first exposed to the research process.- --Michael J.
