Customer Reviews

One of the best jazz guitar method books from way back in the day.

damn near impossible chord voiceings on page 1, but a good followup to book 1, overall

Good Book

Definitely a must have in the collection!

With more indepth explanations of chord structures and progressions, this book is a natural extension to book one. This course has been around for a long time but is still relevant today.

This course is pretty much the gold standard for jazz guitar. If your interested in jazz guitar this is stop # 1.

Excellent condition.

unbelievable course for money. Highly Recommended!!!
