ICD-10-CM 2017 Snapshot Coding Card: Ophthalmology (ICD-10-CM 2017 Snapshot Coding Cards)

ICD-10-CM Snapshot 2017

Ophthalmology

Primary Ending Tip

If a different diagnosis has not been incorporated by the end of the encounter, it is acceptable to assign specific ocular surgery, it may be a definitive procedure, either with or without intraocular incision, or an incision, but a particular incision is not being a more specific code. The appropriate code is assigned as a sequela of procedure that was not coded, but the specific code assigned will not be sequenced when they are the same as the main procedure, either due to a reason about the patient's condition at the time of that particular encounter.

The absence of the "second" code indicates that no additional code is needed. For example, **Refractive Error** (H50.0).
