Airplanes Of The Second World War Coloring Book (Dover History Coloring Book)

Synopsis

During World War II, armed aircraft became more deadly and sophisticated as the Allied and Axis powers struggled for supremacy. Fighters, bombers, reconnaissance planes, and transports were rapidly developed by both sides and sent into the conflict. The technology changed so quickly that some highly effective planes used early on were outmoded before the end of the war. Now Carlo Demand, internationally known graphic artist, has rendered 46 planes of World War II especially for coloring. Among them, the "Enola Gay," the Japanese Zero used by kamikaze pilots, the German Komet jet fighter, and the spunky British spitfire that performed so valiantly in the Battle of Britain. Colorists will find detailed information in captions concerning authentic coloring, markings, and insignia, as well as information about design innovations, each plane's military role and affiliation, and other pertinent data. The illustrations are accurate and authentic, and as part of the Dover Pictorial Archive Series, may be used royalty-free. Thirteen of the planes are shown in full color on the covers. All of the planes pictured here are now, of course, obsolete; but for aviation buffs, military historians, model builders, and illustrators, these superb renderings will recall an era — a time when the needs of a global conflict spurred tremendous advances in aerial technology, both military and commercial.

Book Information

Series: Dover History Coloring Book

Paperback: 48 pages

Publisher: Dover Publications; Clr Csm edition (March 1, 1981)

Language: English

ISBN-10: 0486241076

ISBN-13: 978-0486241074

Product Dimensions: 8.2 x 0.2 x 10.9 inches

Shipping Weight: 6.4 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 81 customer reviews

Best Sellers Rank: #31,203 in Books (See Top 100 in Books) #3 in Books > Crafts, Hobbies & Home > Antiques & Collectibles > Transportation #18 in Books > Children's Books > Education & Reference > History > Military & Wars #23 in Books > Crafts, Hobbies & Home > Crafts & Hobbies > Papercrafts, Stamping & Stenciling > Papercrafts

Age Range: 8 - 14 years

Grade Level: 3 - 8

Customer Reviews

You might think it odd that a middle-aged man might buy a coloring book for himself. However, I bought this book due to a fascination with WW2 fighter planes I used to build as a boy. And I didn't want to have to buy and rebuild the models again to capture the nostalgia and fascination I felt as a youth. The models have long since disappeared from my personal belongings, but the idea of a coloring book with the major ones to look at for a very low price, was too hard to resist. The coloring book met my expectations by providing VERY realistic coloring pages of WW2 fighters apparently based on actual planes. If you include two full-color planes on the front and rear covers, there are 13 color pictures, as well as about 46 black and white coloring pages of fighters, bombers, and cargo planes from the mid 1930's forward that were used in WWII. The pages are printed on a heavy, high quality paper, and each fighter has a paragraph or so of background information at the bottom of the coloring page. Information isn't consistent for each plane, but usually covers the number of each plane produced, their nationality, when they were used in the war, any conversions they underwent, as well their performance against other planes during their era. There is usually a paragraph indicating the colors used on each part of the airplane. The one-page, text-only preface to the book describes the explosion of aircraft-building in the 1930's and 1940's, and describes a couple key planes used to turn the tide in WW2. I agree with a previous reviewer that to color the planes properly, one needs to understand the anatomy of a plane -- the author assumes you know this, so there is no explanation given. Therefore, I appreciate the site listed by a previous reviewer that describes the parts of the plane. Overall, I love this coloring book, really enjoyed seeing the planes whose model numbers I still remember from my boyhood, and reading about their history. I may even get out the pencil crayons to color and perhaps frame a couple of them -- or -- much to the chagrin of my wife, start rebuilding my collection of painted model planes all over again :)

Just starting in adult coloring and I love military WWII planes so I picked this. Has very nice drawings of various aircraft but if you're looking for detailed coloring schemes this is not the book. Most military planes do not lend themselves to complicated color schemes so this is stress free coloring. The paper quality is ok but fine for coloring enjoyment. Great price.

Gave this to an 8 year old for his birthday. He's super interested in history so I thought this might be fun for him. I didn't get a thorough look at it, but I was surprised how much info it had. But not so much to be overwhelming or overshadow the coloring activity. I might be tempted to get it for myself. I think it's a great way to make learning history fun.

Very good book for the price. Pleasantly surprised to see a nice variety of aircraft depicted from all sides during the war including Britain, America, France, Italy, Germany Japan and Russia. Paper is better than I expected too which is nice. Tried fibre tip pens briefly and they did bleed through a little here and there (may have different results with different brands) but colored pencils etc work perfectly with no issues. If you are interested in World War II aircraft, or building models of them and want something a bit different and less fiddly to color, then this is the book for you. I would recommend this book to both adults and children alike.

After a trip to the world-class National WWII Museum in New Orleans earlier this Summer, our boys were fascinated with all things WWII. This is a perfect followup! They love it, and we, their parents, love that they're getting profitable fun that is also educational. We also purchased theÂ Story of World War II (Dover History Coloring Book)Â by Peter F. Copeland. That book and this are a great compliment and provide endless hours of educational fun! HIGHLY recommended!!!

Quality, accurate, detailed, full of aircraft. It even has truly obscure planes like the Westland Whirlwind and Dewoitine 520. Its even inexpensive. My only complaint would be the difficulty understanding how to color them properly. I've built models of many of these, including the Whirlwind. Dover demonstrates that coloring books don't have to be simplistic or cartoonish.

My grandson and I have started coloring in the book, and we both use it to help rethink our problems of the day, after about 15 minutes of coloring we talk about our problems of the day.

Great Quality. Paper is white and sturdy - doesn't bleed through with markers, colored pencils or crayons - unlike most coloring books purchased in retail stores. Pictures are authentic Tanks and planes and fun to color. Our grandson loves Planes and Tanks, so these coloring books provide hours of enjoyment for him.
