Mt. Washington Auto Road (Images Of America)

Synopsis

Reaching more than a mile in the sky and acting as the crown of the Presidential Range, Mount Washington and the Mt. Washington Auto Road have been luring and challenging adventure seekers on foot, on bicycles, or in race cars for over 150 years. The Mt. Washington Auto Road was opened to the public in 1861 and has remained in continuous operation ever since, making this the nation's first man-made attraction. Located in the heart of New Hampshire's White Mountains, the Mt. Washington Auto Road has witnessed the evolution of transportation from mountain wagons drawn by six-horse teams to the modern cars of today. Mt. Washington Auto Road documents the history of this eight-mile path to the summit of the Northeast's highest peak.

During more than 25 years living in and writing about Mount Washington Valley history, Steven Caming has produced several documentaries, authored countless articles, and staged many historical reenactments. He continues to serve as media director for the Mt. Washington Auto Road. The historical photographs utilized in this book have come from the Mt. Washington Auto Road, Philbrook, Wemyss, and author's collections.

I went up Mt. Washington in New Hampshire this past August for the second time, and want to go

again already. This book is a great record of this 8-mile long iconic attraction. Filled with many never-before published photos and lots of history, I wish I would have read it before I went up. One interesting fact is that now it takes about 30 minutes to drive up, and when it opened to the public in the 1860s, it took a horse-drawn carriage four hours!

I loved this book!!!

This author has a particularly lyrical way of bringing history to life. I like the story as much as the pictures! You don't have to like history to enjoy this delightfully written book.
