Cycling Science

Synopsis

Finally, the authoritative resource that serious cyclists have been waiting for has arrived. The perfect blend of science and application, *Cycling Science* takes you inside the sport, into the training room and research lab, and onto the course. A remarkable achievement, *Cycling Science* features the following:

- Contributions from 43 top cycling scientists and coaches from around the world
- The latest thinking on the rider-machine interface, including topics such as bike fit, aerodynamics, biomechanics, and pedaling technique
- Information about environmental stressors, including heat, altitude, and air pollution
- A look at health issues such as on-bike and off-bike nutrition, common injuries, fatigue, overtraining, and recovery
- Help in planning training programs, including using a power meter, managing cycling data, off-the-bike training, cycling specific stretching, and mental training
- The latest coaching and racing techniques, including pacing theories, and strategies for road, track, MTB, BMX, and ultra-distance events

In this book, editors and cycling scientists Stephen Cheung, PhD, and Mikel Zabala, PhD, have assembled the latest information for serious cyclists.

Customer Reviews

Haven't gone through all the contents but what I've seen is very good. Overall it looks like the book is very rich in content quality but not so good on layout and graphics.

Expected a similar experience as read with "Running Science". Unfortunately it's not. Lost interest and wish I could get my money back
