Robert Decker was Professor of Geophysics at Dartmouth College for 25 years; he was also Scientist-in-Charge of the U.S. Geological Survey's Hawaiian Volcano Observatory for 5 years. Barbara Decker is a science writer who has written 15 books and many magazine articles. Barbara is the President of Double Decker Press established in 1984 to publish Road Guides to National Parks and Monuments.

We have used four of the Deckers' national park road guides so far and found them all to be worthwhile--especially at their low price. The guides help ensure that you don't miss the "must see" places. This is especially useful if you have to allocate your time carefully. But if you're going to the "backside"/north side of Mount Saint Helens, better go soon. The forest service road to Windy Ridge looks like it's going to ruin fast.
