Ordnance Survey is Britain's national mapping agency, responsible for the official, definitive mapping of the whole country. They produce and market a wide range of maps for educational and leisure purposes, as well as producing computer data products for government, business and administrative use.

This Ordnance Survey Road Travel Map covers Wales and the West Midlands of Great Britain at a 1:250,000 (1 inch to 4 miles) scale, matching the major and mid-grade road network with a clear color depiction of the physical scale of the terrain. Ordnance Survey maps are the last word in cartography for Britain This edition will allow the traveler to navigate the road networks in Wales and a swath of the Midlands as far north and east as Sheffield and as far South and East as

Swindon. Although at the wrong scale for hiking or other off-road activities, the detail is sufficient to locate parks, such as the Peak District, and some prominent tourist locations, such as Chatsworth House. The map information is printed in English and Welsh, with a grid system for location and an additional chart for distances between major cities. This "Wales and West Midlands map, one of a set of eight covering the whole of Britain, is highly recommended as a useful planning aid for vacationers and other travelers in the United Kingdom.

Love Ordnance Survey maps! Good to have it to plan our next driving holiday.

This is the best map of Wales currently available. Not only does it contain extremely detailed road depictions, but also has useful distance information, a table of restricted motorway junctions, a geographical relief map, and depictions of numerous points of interest. I was interested in a detailed map of the Snowdonia region, and in particular for coverage of Portmeirion, Porthmadog, Llanfihangel-y-Traethau, Penrhyndeudraeth, and Ffridd Uchaf. All this and more was well detailed, making for easy route planning. I heartily recommend this map for anyone contemplating a trip to Wales, particularly Northern Wales.
